

Average View Of USA country over years

Summary:

As you can see in chart from Mars 2009 YouTube to Mars 2017 had low view and a little wobble, but after that they began to rise, as the number of views jumped from 15,429 to 1,918,934 during one year.

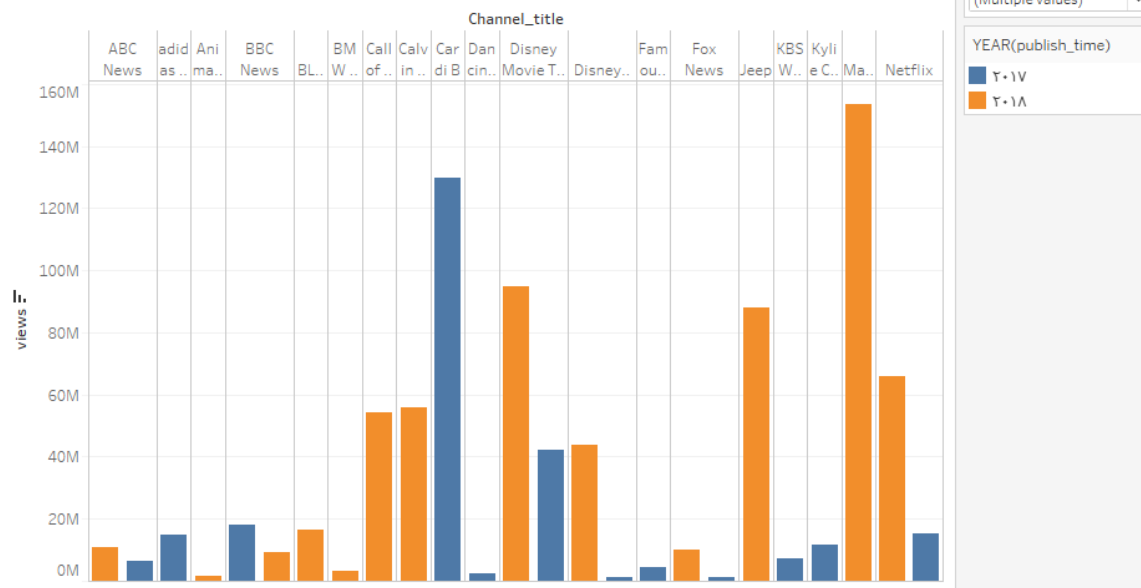

Design:

Line chart use for timeline change, so here we want to know the YouTube view over years
